

Thrive™ is designed to keep your aquatic plants vigorous and beautiful. When used monthly, Thrive™ pellets will ensure your potted plants are fed throughout the season.

Simply use one to two tablets for every gallon of soil each month during the growing season. Push tablet one finger deep into the soil, 3" from the crown of the plant. Press soil around the inserted tablet for best results. It is always a good idea to feed plants every two weeks when the water temperature raises above 75 °F.

Failure to use as directed or changes in water conditions not consistent with label may result in loss or injury to aquatic life. CrystalClear®, Inc. is not responsible for any loss of aquatic life.

KEEP OUT OF REACH OF CHILDREN
